ANDREA FELICITY TINTERO

IT INTERN | TECH SUPPORT SPECIALIST | SYSTEM MAINTENANCE | WEB DEVELOPER

0942-551-6484 • felicityandrea004@gmail.com

PROFESSIONAL SUMMARY

Dedicated fourth-year Information Technology student seeking to enhance my knowledge and skills through academic, research, and hands-on technology-related experiences. Proficient in technical support, database management, and system maintenance, I am eager to apply my technical and research skills responsibly to analyze system issues and complete complex projects. Ready to work collaboratively with others, I bring an analytical mindset, a strong work ethic, and a strict respect for data confidentiality to support your team's daily IT operations.

CORE COMPETENCIES

- **Technical Support & System Maintenance:** Hardware and software troubleshooting, operating system installation, diagnostic testing, system configuration, and preventative maintenance.
- **Database Management & Analysis:** Database configuration, basic query writing, structured data organization, data entry, and system maintenance.
- **Software & Productivity Tools:** Microsoft Excel (data management, formatting, and analysis), Microsoft Office Suite, VS Code, Git/GitHub, and Google Workspace.
- **IT Operations & Security:** Technical requirement translation, data analysis, structured technical research, and strict adherence to corporate data security and confidentiality protocols.
- **Professional Skills:** Proactive problem-solving, structured team collaboration, adaptability, and clear technical communication.
- **Web Development:** HTML, CSS, JavaScript, responsive web design, front-end development, and web-based application troubleshooting.

ACADEMIC & TECHNICAL PROJECTS

BSIT Capstone / Web Development Project (Lumos Lighting Equipment) . | *January 2026 – Present*

Web Developer • Database Administrator

- Engineered a fully responsive web application from scratch using HTML, CSS, and JavaScript, ensuring seamless cross-device compatibility and an intuitive user interface.
- Designed, normalized, and structured the relational database schema; optimized SQL queries and indexing to improve data retrieval speeds and overall system efficiency.
- Managed the project repository using GitHub, establishing branch protection rules and a clean commit history to streamline feature deployment and code reviews.
- Maintained strict data security practices during system construction to protect mock user records and ensure compliance with confidentiality principles.

Sta. Peregrina Elementary School Enrollment System (C# Platform) | *July 2025 – November 2025*

Developer • Database Administrator

- Developed a fully functional enrollment system desktop application utilizing C# syntax, handling student information management and school record logging.
- Designed and structured relational database schemas inside Microsoft SQL Server Management Studio (SSMS) to ensure clean data organization.
- Implemented optimized SQL database tables, primary keys, and relational constraints to map student profiles and manage enrollment processing efficiently.
- Maintained strict data validation protocols within the C# application logic to prevent user entry errors and preserve database integrity.
- Supported system debugging and backend database troubleshooting phases alongside a technical peer to maintain application stability.
- Managed secure data environments using mock student entries, testing system resilience and ensuring adherence to basic data confidentiality rules.

EDUCATION

College of Our Lady of Mercy of Pulilan Foundation, Inc. – Pulilan, Bulacan / *2023 – Present*
Bachelor of Science in Information Technology

CERTIFICATIONS & PROFESSIONAL TRAINING

- Code Spark Chapter 1: Igniting the Cybersecurity Mindset — October 2026
- Ignite Philippines — April 2026
- Introduction to Cybersecurity — November 2025
- Basic First Aid & CPR Training — September 2025
- Robotics Training and Worshop — November 2024
